

**STOP FALLS OR RISK PAYMENT DENIALS TABLES**

Figure 2

FMEA Project Matrix (Part 2)

Critical Failure	Root Causes	Actions Intended to Eliminate/Reduce Failure or Mitigate Effects
All shifts and disciplines do not implement interventions consistently	Lack of training for nonnursing caregivers and transport staff	<ul style="list-style-type: none"> <li>• Fall prevention training for all nonnursing caregivers and transport staff</li> <li>• Annual fall prevention refresher course for all nonnursing caregivers and transport staff.</li> </ul>
Inadequate communication among disciplines	No consistent way for staff to recognize patients at high risk for falls	<ul style="list-style-type: none"> <li>• Implement yellow fall prevention bracelet for every patient assessed to be at high risk for falls.</li> <li>• "Fall Risk" emblems to be placed on doors and patient activity boards to signify patient at high risk.</li> </ul>
Patient not monitored as required by policy/procedure	Fall prevention monitoring not viewed by nursing staff to be a high priority task	<ul style="list-style-type: none"> <li>• Importance of fall prevention monitoring reinforced by nurse manager at staff meetings</li> <li>• Monthly report of patient fall occurrences shared with staff, along with common factors that precipitated the falls</li> </ul>
